

NB-IoT CELLULAR CONNECTIVITY - POWERED BY ARKESSA

Δ R K E S S Δ

Considering NB-IoT for your connected application?

Arkessa delivers world-wide, world-class NB-IoT connectivity solutions that make it easy to design, deploy and manage your IoT devices securely, efficiently, and at scale.

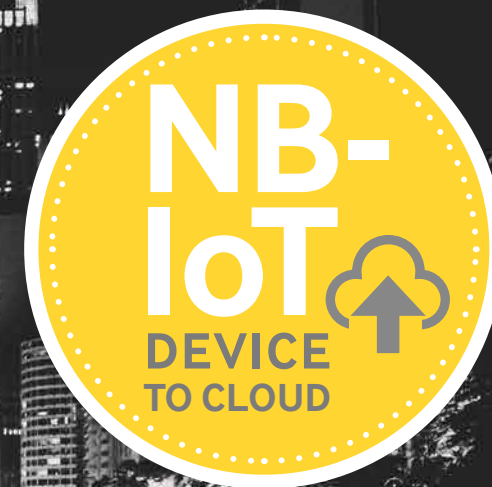

Why NB-IoT?

- Reduced power consumption
- Up to 10 years' battery life
- Lower power
- Lower data
- Lower cost
- High density deployments
- Better building coverage

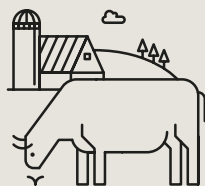

Getting started with NB-IoT

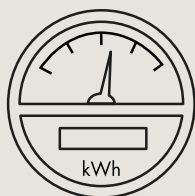

Arkessa offers an extensive NB-IoT footprint across the globe, giving our customers freedom to test and deploy their low-data, high-density applications in different geographical locations.

By 2025 it is predicted that NB-IoT and LTE-M will account for over half of all cellular IoT connections.

Agriculture

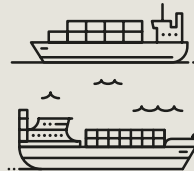

Metering

Assisted Parking

Lighting

Tracking

Smart Cities

Smart Spaces

Wearables
